

American solar energy storage power company

Overview

Why should you choose American Solar?

Smart homeowners, businesses, and non-profits achieve massive energy cost savings with solar panels from American Solar. As the leading clean energy company in Northern California, we specialize in solar systems, energy storage, estate scale battery backup and electric pool heating to fully satisfy your residential or commercial property.

What's going on with the US solar and storage market?

Opportunity continues to characterize the USA solar and storage market following a record-breaking year for solar in 2024 and a doubling of utility-scale storage.

How many GW of solar and battery storage will be added in 2025?

In light of ongoing market dynamics, the U.S. Energy Information Administration projects 32.5 GW of utility-scale solar capacity and 18.2 GW of utility-scale battery storage to be added in 2025. This would represent a 69% and 250% increase in solar and battery storage capacity in the U.S., respectively.

What is solar & storage finance USA 2025?

Why This Summit?

Solar & Storage Finance USA 2025 is a transaction-focused summit where capital providers connect with the leaders executing America's pipeline of utility scale solar and storage projects, and market shifts are unpacked in real time by those closing deals today.

What happened to Solar & Storage deals in 2025?

Despite the strong projects, in the first quarter of 2025, solar and storage deal activity dipped by 15% as new tariffs introduced uncertainty into the market.

As of May 2025, a 90-day trade truce between the U.S. and China was announced, reducing U.S. tariffs on Chinese goods from 145% to 30%.

Will convolt energy revive solar panel manufacturing?

For years, the commitment to solar panel manufacturing has been missing in America. Convalt Energy is on track to revive this industry by becoming America's second-largest mono-crystalline solar panel manufacturer. Convalt started developing power generation projects in Asia and Africa.
