

Average commercial energy storage price per 300MW in Greece

Overview

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years.

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years.

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years. The submitted bids were capped at €115,000/MW per year, with the lowest.

Eleven projects by seven bidders were awarded at an average bid price of EUR 47,680 (USD 51,726) per MW a year. The selected offers were priced between USD 44,100/MW and EUR 49,917/MW, against an announced cap of EUR 115,000 per MW. The targeted capacity in the tender round, which was met with huge.

Starting in May 2023, Greek households and farmers are able to apply for public funds to cover the purchase and installation of small solar+storage systems up to 10.8kW (featuring up to 10.8kWh of storage). The grants can cover up to 75% of total cost of a system.¹⁰ The total budget available is.

Further restrictions complicated the bidding process, including a maximum capacity of 100MW per project and 300MW per region, and no participant allowed to win more than 25% of any auction. These restrictions meant that Eunice and Piritium both bid 50MW for projects licensed at 250MW/1000MWh and.

Winning projects in Greece's energy storage program receive contracts for difference (CfDs) providing a guaranteed income for 10 years, with capped prices set at €115,000/MW per year in both the first and second auctions. Projects must be operational by the end of 2025, and investors are mandated. How many MW of new battery storage capacity does Greece have?

The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program. The projects range in size from 8,875 MW/17,75 MWh to 49,9 MW/100 MWh).

Does Greece have a 1 GW energy storage program?

The auction is part of Greece's 1 GW energy storage program. The country announced its 1 GW energy storage program in the summer with three separate tenders featuring 400 MW, 300 MW and 300 MW of capacity. The first tender awarded 12 energy storage projects in August, with 411,79 MW of capacity in total.

How often should energy storage projects be completed in Greece?

Investors will be expected to submit progress reports every three months to ensure timely construction. Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of €49,748/MW per year.

How much does an energy storage auction cost in Greece?

The regulator said the auction was highly competitive, leading to an average tender price of €47,680 (\$51,506)/MW per year. Greece's energy storage auction program awards contracts-for-difference (CfD) over periods of 10 years. The submitted bids were capped at €115,000/MW per year, with the lowest successful bid set at €44,100/MW per year.

How much does a GW energy storage auction cost?

This second auction comes after the initial round of auctions in August 2023, when 12 projects totaling 411 MW were awarded at an average annual cost of €49.748 per MW. Another round is planned for April 2025, with the goal of allocating an additional 300 MW. These tenders are part of the country's 1 GW energy storage auction program.

How much does it cost to apply for energy storage?

Additionally, an application fee of €2,500 per submission to the regulator is required. A 100% tender subscription rule fosters competition, requiring at least 576 MW of energy storage capacity to vie for selection to secure 288 MW.
