According to the Ministry of Energy, by the end of last year, Azerbaijan's renewable energy capacity was estimated at around 1,700 MW, accounting for 20% of the country's total power generation. By 2027, the construction of eight industrial-scale solar and wind power plants is expected to add 2 GW.

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors Influencing BESS Prices.

In Azerbaijan, the purchase of batteries for the storage of electricity obtained from renewable energy sources is a topic of discussion, said Elnur Soltanov, Deputy Minister of Energy, Report informs. The purchase of batteries for the storage of electricity obtained from renewable energy sources is.

State-owned Azerenerji JSC, which serves as the TSO and largest electricity producer, has been pursuing the overhaul of the transmission network along with the renovation of existing generation facilities. Additional capacity growth has primarily been established by gas-engine and CCGT units along.
