This is the Energy Report Card (ERC) for 2023 for the Bahamas. The ERC also includes sectoral data and information on policies and regulations; workforce; training and capacity building; and related areas. The data and information that are available in the ERC were mostly provided by the government.

capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the world at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the global.

In fact, The Bahamas has one of the highest electricity rates in the Caribbean, with an average cost of around \$0.36 per kilowatt-hour (kWh) in 2019. This is significantly higher than the regional average of \$0.25 per kWh and has placed a considerable burden on both households and businesses. In.

The 2021 Energy Report Card for The Bahamas provides an overview of energy sector performance and includes energy efficiency, projects, technical assistance, workforce, training and capacity building information, subject to the availability of data. Click to view: [ERC_Bahamas_final_003](#)
