The current Levelized Cost of Energy (LCOE) for a "PV + 4-hour storage" system has dropped to \$0.32/kWh—58% lower than traditional diesel generation. However, due to grid transmission constraints, over 50% of solar generation in the north is being curtailed. Studies suggest that increasing the.

The winning developers are Zapaleri, which secured 126 GWh for a solar-plus-storage facility at a price of \$0.03836/kWh, and FRV Development Chile I, which was awarded 651 GWh for a hybrid wind-solar project at a price of \$0.03719/kWh. The CNE had initially accepted to review the bids from 15.
