Overview

How many mini-grids are there in Ghana?

From the relevant planning literature (Energy Commission of Ghana, 2019; Government of Ghana, 2015), between 300 and 400 mini-grids are intended to be deployed by 2030. These are expected to provide electricity to about 350,000 of the 2.9 million residents of the Island and Lakeside communities (Government of Ghana, 2015).

Is there an ex-post analysis of mini-grids in Ghana?

Generally, there is yet to be any form ex-post analysis of mini-grids in the Ghanaian context.

Who owns a minigrid in Ghana?

Ownership of the project's assets is vested in the government of Ghana. In all, a total 228 kW of photovoltaic capacity has been installed at the five minigrid sites supplying a total of 598 households. Households use this electricity typically for lighting, cell phone charging, powering their television and radio, fans, and fridges.

Is mini-grid electrification possible in Ghana?

Socio-economic study for mini-grid electrification of island communities in Ghana Performance analysis of different grid-connected solar photovoltaic (PV) system technologies with combined capacity of 20 kW located in humid tropical climate International Journal of Hydrogen Energy, 42 (2017), pp. 4626 - 4635, 10.1016/j.ijhydene.2016.10.119.

Are mini-grids financially viable?

Cost of electricity supply remain too high for financial viability of mini-grids. Efficient tariff design can significantly lower the financial viability gap. About 85% of the population of Ghana are resident in communities with grid coverage but actual connection to the grid stands at 82% (Energy

Commission of Ghana, 2020).

Do minigrid communities benefit from renewable electricity access?

Although the surveyed communities generally shared similar socioeconomic characteristics with the rural poor in Ghana (and hence results are generalizable), these minigrid communities have had the benefit of already enjoying renewable electricity access relative to the other rural population with little or no electricity access.
