The per kWh price of NCM811 cell is currently the lowest in Greater China due to the low cost of battery materials, thanks to high localization, and the price difference in the manufacturing cost of these cells compared to Europe and North America. However, S&P Global Mobility forecasts a more than.

Figure 1 presents the estimated cost for nickel manganese cobalt (NCM) 811 cells for a 10 gigawatt-hour per year production rate across four different countries. Figure 1 In the first quarter of 2023, NCM 811 cell costs in China were estimated to be 101 dollars per kilowatt hour (kWh) and 110.

This includes benchmark prices for lithium and cobalt, two battery materials that continue to experience market volatility and supply/demand imbalances. Our widely used prices are market-reflective, assessing both the buy- and sell-side of transactions. Trade with relied upon price data that is.
