

Average renewable energy storage price per 30kWh in Bahamas

Overview

Indicators of renewable resource potential capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the cl.

Indicators of renewable resource potential capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the cl.

capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the cl d at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the global.

Located north of Cuba, with the Turks and Caicos Islands to the southeast, the Bahamas has an average electricity cost of \$0.32 per kilowatt-hour (kWh), in line with the Caribbean regional average of \$0.33/kWh. Like many island nations, the Bahamas is almost 100% reliant on imported fossil fuels.

This is the Energy Report Card (ERC) for 2023 for the Bahamas. The ERC also includes sectoral data and information on policies and regulations; workforce; training and capacity building; and related areas. The data and information that are available in the ERC were mostly provided by the government.

ins that very little data was identified on available insurance products for renewable energy systems in The Bahamas. One renewable energy devel per quoted \$15/kW/year for the cost of insurance for a 500kW solar PV sy otes that BPL did not propose alternative data and sources nor did the company.
