How much does electricity cost per kWh?

The national average is 35.67c per kWh, but prices ranging from around 32c to over 45c per kWh. Between a third and half of power price costs are due to transmission charges. We all rely on electricity in our day-to-day lives. And whether you are watching TV, running a heat pump, or putting on a load of washing – you're adding to your power bill.

How much does a kWh cost in New Zealand?

However, depending on where you live in the country, the price can vary between as low as 31.93c per kWh, in Christchurch, to 45.42c per kWh in Kerikeri and 45.45c in Westport. Of course, you can't do much about where you live, apart from move.

How does the government calculate residential electricity cost per unit?

The Ministry collects the total value of sales, the total volume of electricity sold, and the number of connections. The residential electricity cost per unit is derived by dividing the dollar value of residential electricity sales by the number of kilowatt-hours (kWh) sold to residential customers.

How much does an electricity retailer charge a consumer?

An electricity retailer may charge a consumer 100 cents/day and 22c/kWh of electricity consumed. 26.6 c/kWh — that is, $(2125/8000) \times 100$. If the Retailer offered a 10% prompt payment discount, the final cost to the consumer would be 23.9 c/kWh. The line charge component is calculated in a similar manner (all figures include GST).

Why does the cost per unit of electricity increase as demand decreases?

the cost per unit of electricity used increases as average electricity demand decreases (and vice versa). This is because some parts of customers' electricity bills are fixed daily costs if demand in a given period is lower, then the average cost per unit used is higher because the fixed costs are spread across fewer units.

Average residential ESS price per 100kW in New Zealand

10kW Solar System Price Comparison (Updated for 2025)

3 ???· 10kW Solar System Price: The Short Answer Since the end of 2024, the pricing of solar systems in New Zealand for grid-tied, commercial and off-grid solar has generally decreased. ...
