But here's the kicker: while global lithium-ion battery prices have dropped to \$0.495/Wh in 2024 [3] [4], Yemeni buyers still face a pricing rollercoaster. Let's unpack this paradox. Yemen's battery market operates like a middleman marathon. A typical 10kWh system that costs \$4,950 in China [4].

While the report identifies central drivers for the diffusion of solar energy, it also discovers critical barriers: Since 2017, growth in the solar sector has been stagnating, since bottlenecks in the sector hamper a further diffusion. The article concludes with a set of recommendations for both.
