

Average solar diesel hybrid storage price per 5kW in Czech

Overview

Why are Czech businesses investing in renewable projects without subsidies?

The subsidy increases to cover up to 75% of costs for community projects. But what we noticed at Wattstor is that Czech businesses are investing in renewable projects even in the absence of subsidies, because they have realised the strong business case for generating clean energy on site.

How does the Czech government cope with higher energy bills?

Unlike other European countries, the Czech Government has traditionally relied on the market to self-regulate, avoiding state intervention. This means that as prices rose, consumers and businesses had to cope with higher energy bills.

Is there a potential for solar installations in Europe?

There is a huge potential for solar installations, with ideal climate conditions and substantial funding coming from the EU. The situation is similar in other areas of Central and Eastern Europe, where Wattstor has already completed a number of successful renewable energy installations – such as Poland, Croatia and Slovakia.
