

## **BESS project financing options in Hungary 2025**

## Overview

---

Today, we are seeing non-recourse project finance for 600+ MW portfolios, mezzanine debt entering the capital stack, and public banks co-financing with private lenders. For developers, asset managers, and financiers alike, this is a call to sophisticate how BESS projects are packaged and financed. Will MAVIR's new support scheme boost electricity storage in Hungary?

Due to recent changes to Mavir's operational code, the transition of granted grid connections from photovoltaic power production to BESS projects will be allowed. This new support scheme is expected to provide a necessary boost to electricity storage in Hungary.

What is a Bess project?

Based on Government Decree 382/2023 (VIII 14) of Hungary, the approach to electricity production and consumption from renewable energy sources has taken a new turn: BESS projects are now among those investments the government intends to support with financial incentives.

What does Bess stand for?

A recent legislative act in Hungary laid down the principles for the eagerly awaited battery energy storage systems (BESS) support scheme. The incentives follow well-known patterns similar to those already available for solar projects.

## BESS project financing options in Hungary 2025

---

### The rise of bankable BESS projects in Europe

As the renewable energy sector rapidly evolves, battery energy storage systems (BESS) are emerging as a critical pillar for decarbonization. However, with capital constraints and rising market
