Overview

Is there a single energy policy in Belgium?

There is no such thing as a single energy policy in Belgium; institutional reforms in 1980 transferred powers from the federal state to the regions, including energy. The Special Act of 8 August 1980 divides powers as follows: The federal state is responsible for the following matters:.

How is Belgium preparing for a gas transition?

Belgium is also working with France, Germany and the Netherlands to ensure that security of gas supply is maintained as production from the Groningen gas field is phased out. Since the IEA's last energy policy review in 2016, Belgium has made progress on its energy transition.

What is Belgium's energy supply?

In 2020, fossil fuels (mainly oil and natural gas) accounted for 71% of its energy supply. Most fossil fuel demand comes from industry and transport, but Belgium's buildings also have a notable demand for gas, while oil covered 33% of residential building demand in 2020.

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore "energy atoll" (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

How much storage capacity does Belgium need in 2020?

The need for storage capacity in Belgium is expected to increase from 7 GW to 12 GW in 2020.

What are Belgium's energy priorities?

Belgium is committed to working actively and constructively to finalize the ongoing legislative agenda and its legal-technical completion. Other energy related priorities for Belgium are: We aim to keep up the momentum of the energy transition through our combined presidencies: EU, Benelux and Penta.
