

Business energy storage tender price in Poland 2026

Overview

Did European energy secure a contract for a battery project in Poland?

European Energy successfully secured a contract for several battery projects in Poland. The Polish Transmission System Operator Capacity Market auction has awarded a 17-year contract, indexed to inflation, for four battery projects to European Energy.

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

How many GW of battery storage contracts are there in Poland?

Poland has concluded its 2028 capacity market auction, awarding around 1.7GW of contracts to battery storage projects.

Is Poland moving towards battery energy storage systems (BESS)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

How many battery projects are being built in Poland?

The Polish Transmission System Operator Capacity Market auction has awarded a 17-year contract, indexed to inflation, for four battery projects to European Energy. The four projects have a combined capacity of 114 MW and are located in the north-western part of Poland. European Energy has 24 months to bring the projects to the ready-to-build stage.

How much does a 2028 electricity contract cost in Poland?

The auction which took place last month (December 2023) cleared at a fixed, consumer price-indexed (CPI) price of PLN 244.90/kW (US\$61.73) per year for the contracts which start in 2028, the Polish state bulletin revealed yesterday (9 January). The contract lengths range from 1 to 17-years.
