Who makes Fimer solar inverters?

FIMER is a well-established Italian-based inverter manufacturer that took over ABB's solar division in early 2020. Do hybrid inverters cost more than a solar inverter?

It's worth noting that hybrid inverters used for battery storage generally cost 20 to 40% more than the equivalent size solar inverter due to the additional battery controls and energy monitoring. However, the price difference is declining as manufacturers utilise common components across the inverter range.

Are string solar inverters a good choice for utility-scale solar farms?

String solar inverters up to and above 100kW are also increasingly popular for utility-scale solar farms due to the advantages of string-level monitoring and ease of servicing compared to central inverters. Below is our list of the most popular 3-phase inverters on the Australian market in the 8kW to 30kW and

30kW to 100kW categories.

Are SMA Solar inverters reliable?
