

## Cairo power cuts and energy storage

## Overview

---

Why are Egyptians struggling to get electricity & air conditioning?

Amid extreme temperatures, the state-owned electricity company is struggling to meet the demand for electricity and air conditioning in a population of over 114 million [Cairo] Egyptians are becoming increasingly frustrated and impatient due to prolonged power outages caused by extreme heat and a shortage of natural gas.

How can Egypt improve the balance of payments?

Accelerate the deployment of renewable energy to lower the cost of energy supply and develop a regional market for decarbonised fuels. Accelerate the retirement of inefficient fossil-fuel plants to abate carbon emissions and free up Egypt's domestic gas resources for sale at global energy prices, hereby improving the balance of payments.

Will Egypt solve the energy problem by March 2024?

Another adjustment came in January 2024 when the government decided to restrict the power outages to morning hours to cater for the students' midterm exams. This seemingly thoughtful decision came hand in hand with raising electricity prices by 7 to 20 percent. Currently, Egyptian officials promise to solve the energy problem by March 2024.

How did the Houthis affect Egypt's energy balance?

To make matters worse, the Houthis' attacks in Bab El Mandeb since November 2023 have pushed Egypt's Suez Canal revenues down by 40 percent. All of this raises energy inequalities among Egypt's population. This article sheds light on the war's impact on Egypt's energy balance and the social and behavioral changes it resulted as blackouts expanded.

Is Egypt a gas hub?

Egypt had years-long ambitions to become a regional gas hub in the Eastern

Mediterranean, but it seems to have fallen into the trap of dependence on Israeli gas imports pushing the country to import LNG rather than exporting it, depleting its much-needed foreign reserves. How are citizens coping with blackouts?

.

Why did Egypt stop rationing gas in summer 2023?

The Egyptian government had already announced in July 2023 a power rationing program to limit consumption during an extreme summer heatwave as output from the Zohr field—Egypt's largest gas field—alarmingly declined. It also halted the gas it exports to Europe in the form of Liquefied Natural Gas (LNG) for the whole summer of 2023 period.
