

Cape verde energy 1 65 million energy storage

Overview

Cape Verde or Cabo Verde, officially the Republic of Cabo Verde, is an and of in the central Atlantic Ocean, consisting of ten with a combined land area of about 4,033 square kilometres (1,557 sq mi). These islands lie between 600 and 850 kilometres (370 and 530 miles) west of , the westernmost point of con.

How much of Cape Verde's energy comes from renewable sources?

Currently, 20% of its energy comes from renewable sources, and the goal is to increase that to 50% by 2030. In 2023, Portugal signed an agreement to forgive €140 million of Cape Verde's debt in exchange for the country investing in environmental projects. This agreement is one of the first debt-for-nature swaps in Africa.

What are the natural resources of Cape Verde?

Cape Verde has few natural resources. Only five of the ten main islands (Santiago, Santo Antão, São Nicolau, Fogo, and Brava) normally support significant agricultural production, and over 90% of all food consumed is imported. Mineral resources include salt, pozzolana (a volcanic rock used in cement production), and limestone.

Who owns Cape Verdean media?

The media is operated by the Cape-Verdean News Agency (secondarily as Inforpress). Nationwide radio stations include RCV, RCV+, Radio Kriola, and the religious station Radio Nova.

How did Cape Verde recover?

However, Cape Verde gradually recovered economically by becoming an important commercial centre and useful stopover point along major shipping routes. Cape Verde became independent in 1975. Since the early 1990s, it has been a stable representative democracy and has remained one of the most developed and democratic countries in Africa.

Why is Cape Verde important?

Cape Verde's early prosperity slowly vanished. However, the islands' position astride mid-Atlantic shipping lanes made Cape Verde an ideal location for re-supplying ships. Because of its excellent harbour Mindelo, located on the island of São Vicente, became an important commercial centre.

Where is Cape Verde located?

The Cape Verde archipelago is in the Atlantic Ocean, approximately 570 kilometres (350 mi) off the western coast of the African continent, near Senegal, The Gambia, and Mauritania as well as part of the Macaronesia ecoregion. It lies between latitudes 14° and 18°N, and longitudes 22° and 26°W.
