

## Capital portable power storage detection

## Overview

---

- The concept and applications of utility-scale PESS••.

Can portable energy storage systems complement transmission expansion?

Portable energy storage systems can complement transmission expansion by enabling fast, flexible, and cost-efficient responses to renewable integration that is crucial for a timely and cost-effective energy transition.

What does Capital Power do?

At Capital Power, we contribute to the communities in which we operate with the aim of building a lower-carbon future for all. We engage our neighbours, consider their interests and build real relationships. We aim to source supplies and services locally for our operations, as well as hire from the community.

Is portable deployment a viable alternative to stationary deployment?

We find that portable deployment has the potential to enhance profitability relative to stationary deployment in 36% of the studied counties and to exceed costs in San Diego sites as well as several other locations as battery costs drop.
