

## Cheapest microgrid storage installation offer in Estonia

## Overview

---

How much money has Estonia provided for energy storage projects?

A state agency in Estonia has provided €5.2 million (US\$5.7 million) in grants for 10 energy storage projects, including a 4MW/8MWh battery storage project from utility Eesti Energia. The state-funded Environmental Investment Centre announced the grant funding for the ten projects being developed by six companies today (28 June).

Will Eesti Energia install a grid-scale battery energy storage system?

Estonia-based energy company Eesti Energia plans to install what will be its home country's first grid-scale battery energy storage system (BESS), of 25 MW/50 MWh in size. The state-owned group said last week it has launched a procurement to find a supplier for the facility this summer. The process will be open internationally.

How will a solar energy storage facility work in Estonia?

The proposed facility is planned to be installed in Ida-Viru county in Estonia's northeast. It will provide one hour of storage capacity, during which it will release electricity equal to the consumption of around 150,000 households. It will enable the storage of solar power produced by 2,500 residential installations for over two hours.

How many energy companies are there in Estonia?

The six companies are Utilitas Tallinn, Utilitas Estonia, Sunly Solar, Prategli Invest, Five Wind Energy, and Eesti Energia, and three out of the ten are heat storage projects, with the remainder for storing electricity.
