

China power energy storage tender announcement

Overview

China Electric Equipment Group has published the results of its 2025 centralized procurement for energy storage cells, with almost the entire 7,248 MWh tender awarded to 314 Ah products. The tender was divided into 10 packages, the tender covered cell capacities of.

China Electric Equipment Group has published the results of its 2025 centralized procurement for energy storage cells, with almost the entire 7,248 MWh tender awarded to 314 Ah products. The tender was divided into 10 packages, the tender covered cell capacities of.

State-owned EPC firm China Power Construction Group (Power China) recently concluded a 16GWh BESS supply tender, which resulted in extremely low prices amidst a squeezing of market share and increased buying power from state-owned companies, an S&P analyst told Energy-Storage.news. The tender for.

China Energy Engineering Corporation's landmark procurement signals a shift toward market-driven energy storage, with bids reflecting aggressive cost-cutting and rising industry consolidation. From ESS News China Energy Engineering Corporation (CEEC), a state-owned infrastructure giant, has.

The tender marks the largest energy storage procurement in China's history. In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were.

China's independent power producer CGN New Energy has announced the results of its 2025 procurement for lithium iron phosphate (LFP) battery energy storage systems, which will be installed alongside solar and wind plants as well as standalone facilities. CGN issued the tender announcement in late.

One of the dominant state-owned infrastructure companies, China Energy Engineering Corporation (CEEC), launched a major procurement procedure on lithium iron phosphate (LFP) battery systems amounting to 25 GWh. The

tender is one of the greatest energy storage projects in China, and it will signify.

CGN New Energy has selected seven winners from 50 bidders in its 10 GWh battery energy storage system (BESS) tender, with the lowest bid at CNY 0.458/Wh (\$63/kWh). From ESS News Chinese independent power producer CGN New Energy has announced the results of its 2025 procurement for lithium iron. What is the largest energy storage procurement in China's history?

The tender marks the largest energy storage procurement in China's history. In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were opened on December 4.

How much does energy storage cost in China?

In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were opened on December 4. The tender attracted 76 bidders, with quoted prices ranging from \$60.5/kWh to \$82/kWh, averaging \$66.3/kWh.

How will powerchina select a qualified supplier for energy storage system equipment?

According to the previously announced plan by PowerChina, this tender aims to select qualified suppliers for energy storage system equipment for 2025-2026. After the selection, a framework agreement will be signed.

What is powerchina's storage initiative?

This storage initiative is part of PowerChina's broader equipment procurement plan announced on November 13, which also includes 51 GW of solar modules, 51 GW of inverters, 25 GW of wind turbines, and 15,240 prefabricated 35kV substations.

Is China Power Construction Group squeezing market share?

Image: China Power Construction Group. State-owned EPC firm China Power Construction Group (Power China) recently concluded a 16GWh BESS supply tender, which resulted in extremely low prices amidst a squeezing of market

share and increased buying power from state-owned companies, an S&P analyst told Energy-Storage.news.

How many power generation companies are there in China?

China has five 'major' and six 'minor' state-owned power generation companies that develop, own and operate a majority of its generation assets, and Power China is one of two engineering, procurement construction (EPC) firms that build most of those assets, the other being CEEC.
