

## Containerized BESS tender price in Italy 2026

## Overview

---

What is the business case for Bess in Italy?

**Revenue Streams for BESS:** The business case for BESS in Italy is underpinned by four main revenue streams: wholesale trading, the Ancillary Services Market (MSD), the Capacity Market (MC), and the new energy storage subsidy scheme (MACSE).

Is Bess a good investment in northern Italy?

While Northern Italy currently has the largest installed BESS capacity in the country, a build-out of RES in the South is increasing energy price volatility, creating a more compelling investment case for BESS in this region.

How will MACSE tender targets affect Bess investors?

MACSE tender targets will adapt to the zonal need for storage, but market inefficiencies in predicting fundamental value drivers (e.g., RES buildout, lack of flexibility, interconnection constraints) will likely create locational merchant upside for BESS investors.

Who won the capacity market auction in 2027 in Italy?

**Image:** Enel. BESS technology has won the bulk of new resource contracts in the capacity market (CM) auction for delivery in 2027 in Italy. The auction took place last week (26/27 February) and awarded 38,057MW of obligations to existing resources and 594MW to new resources, alongside 4,365MW to resources located outside of Italy.

How much storage capacity does Terna need for 2028?

Terna has identified a target of 10 GWh of additional storage capacity for 2028 to be financed through MACSE. The maximum and minimum requirements for each of the 6 MACSE zones are summarised in Chart 1. Some important context on volume procurement:
