

Domestic energy storage supplier quotation in Hungary 2025

Overview

Will Hungary's new energy support system deter investors?

The uncertainties regarding the exact features of this new support system are deterring many investors. 1.4.4 Whilst, currently, Hungary's electricity generation capacities appear to be sufficient to meet demand, many of the generation facilities need decommissioning or updating in the near future.

How many solar facilities will Hungary have in 2026?

In another tender, for a wider range of companies, contracts are being signed to support the completion of 50 facilities in 2026 with HUF 62bn of state contributions. Lantos said Hungary's solar energy capacity has surpassed 7.5 GW.

How many solar plants will Hungary have by 2030?

Lantos said Hungary's solar energy capacity has surpassed 7.5 GW. By 2030, they are calculating that there will be 12 GW of solar plants, but additional network investments will be needed to connect this capacity to the grid.

Will a loss of imports affect Hungary's oil & gas supply?

Talking about the stability of Hungary's oil and gas supply, the minister said the majority of fossil fuel shipments now arrive from the south, the complete loss of imports from the east does not pose an immediate risk to supply security.

Will combined cycle gas turbine power plants help reduce import exposure?

The minister said combined cycle gas turbine power plants will help reduce import exposures and greatly contribute to strengthening energy sovereignty and supply security. With plans for a 600 MW pumped-storage power plant, smaller 100 MW ones are also being considered.

How much money is being given to green energy production & storage?

Lantos said through currently running applications, families and businesses are being supported by HUF 260bn of funding for investments into green energy production and storage, and this amount could soon exceed HUF 300bn.
