Domestic energy storage supplier quotation in New Zealand 2025

Overview

Will Rankine power supply increase wholesale electricity prices in New Zealand?

Concept Consulting's modelling shows that without thermal generation from the Rankine units as part of New Zealand's energy storage solution, wholesale electricity prices would likely be 60% higher in the short-term (the next two-to-three years) and 11% higher in the long-term (ten+ years).

What's going on with energy prices in New Zealand?

And then there's more recent data. An analysis by Octopus Energy shows that between September 2024 and January 2025, standard prices from three of the country's largest power providers – Contact, Meridian, and Mercury – had increased by 5% to 15% in Auckland, Wellington, and Christchurch.

Why is fuel storage important in New Zealand?

The choice of fuel used for storage is critical for security, price stability and environmental impact. There is value in New Zealand having diversity for its storage solutions, as seen by the impact of the lack of gas in Winter 2024. Working with every facet of the energy industry, to help clients respond to business issues and trends.

What happened to electricity prices in New Zealand in 2024?

An analysis by Octopus Energy shows that between September 2024 and January 2025, standard prices from three of the country's largest power providers – Contact, Meridian, and Mercury – had increased by 5% to 15% in Auckland, Wellington, and Christchurch. Prices for short-term discounted plans had increased by as much as 40%.

How long does a home solar system last in NZ?

Most home solar systems in NZ pay off in less than 10 years, which means you still get 20 or more years of free energy and freedom from price hikes and

blackouts. Check out this image below showing how the cost of your grid power is distributed across five different categories.

Are power costs rising in NZ?

The MBIE says that power costs in NZ have risen by an average of 3% every year since 2006. More interestingly, there was only one instance (2016) when the price dropped instead of rising. And then there's more recent data.
