What does an assembler do?

Assemblers work in production factories and assembly lines and may have a specialized role in the manufacturing and assembly of an item such as installing fasteners or connecting wires. They maintain an in-depth knowledge of industry safety standards and regulations, allowing them to safely operate heavy machinery and use resources appropriately.

What does a heavy machinery assembler do?

They maintain an in-depth knowledge of industry safety standards and regulations, allowing them to safely operate heavy machinery and use resources appropriately. Assemblers aim to be as efficient and consistent as possible when putting together a product. They troubleshoot problems with their equipment and service it to ensure it works properly.

What does an assembly manager do?

Assemblers generally report directly to the Production Manager who oversees the assembly line and other areas of a manufacturing plant or factory. Production Managers assign Assemblers to specific tasks, train them on best practices and address any issues that come up during production.
