

Energy storage assembly plant closed down

Overview

Why did ESS Tech close last week?

Oregon-based iron-flow long-duration energy storage system manufacturer ESS Tech Inc. almost closed last week if not for an unexpected financial boost. ESS announced last week that it may need to take “workforce actions” if unable to raise enough capital to allow the company to avoid a shutdown.

Why did ESS get 4 energy warehouses?

ESS said it has secured orders for four Energy Warehouses in its strategy to move existing inventory and pivot to just offering the Energy Base product. The company is counting on the advanced manufacturing production tax credits (45X) included in the Inflation Reduction Act.

Could NRG repurpose the Mojave Desert plant?

The plant occupies more than 3,200 acres of federal land in the Mojave Desert near the California-Nevada state line. In its statement, NRG suggested the site could be repurposed for solar silicon photovoltaic energy production after decommissioning of the existing plant, but did not share any specific plans for that future work.

Energy storage assembly plant closed down

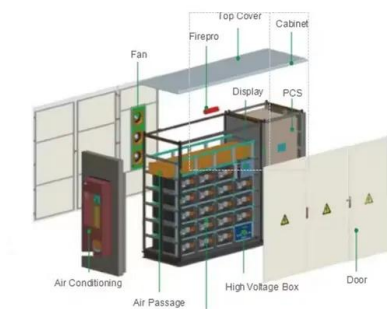

SolarEdge closes energy storage division

Power electronics giant SolarEdge announced today it will shut down its energy storage division. This will result in the loss of 500 jobs, mostly ...

SolarEdge announces closure of its energy storage ...

SolarEdge has announced it will close and sell off its energy storage business and assets, resulting in cutting its workforce by about 12%, ...
