

Energy storage conference viewpoint 2022

Overview

When is the energy storage global conference 2022?

The fifth edition of the Energy Storage Global Conference will be held on 11-13 October 2022 and is organised by EASE - The European Association for Storage of Energy, in collaboration with the European Commission's Joint Research Centre, as a hybrid event at Hotel Le Plaza in Brussels, as well as online.

What is the energy storage Conference?

The conference, which has been organised in partnership with Messe Düsseldorf and Energy Storage Europe since 2015, will focus on the current state of research and the social, political and legal framework conditions of energy storage.

What is the energy storage global conference (ESGC)?

The fifth edition of the Energy Storage Global Conference (ESGC) was held on 11 - 13 October 2022 and gathered over 365 onsite and online participants representing EU and national policymakers, utilities, DSOs, TSOs, suppliers, consultancies, the research community and National Regulatory Authorities.

What is the Energy Storage Summit USA 2026?

#StorageSummit As the U.S. energy storage market scales rapidly in the wake of policy shifts and technological breakthroughs, the Energy Storage Summit USA 2026 returns to connect the entire value chain - from storage developers and utilities to investors, grid operators, and innovators.

How many lectures are there in the energy storage Conference?

In up to five parallel series of lectures, experts from science, practice, politics and society will focus on the current state of knowledge about energy storage. The approximately 200 lectures will be supplemented by a poster exhibition with over 100 presentations and a trade fair exhibition with around 180

companies and firms.

How can energy transitions be addressed at the same time?

They can address numerous challenges of the energy transition at once: stabilise the electricity grids, support the shutdown of power plants, make regionally generated electricity available locally and compensate for fluctuations in renewable energy generation.
