

## Energy storage customer acquisition

## Overview

---

How much money did energy storage companies make in 2022?

Corporate funding of energy storage companies exceeded US\$26 billion worldwide in 2022, a 55% jump from 2021's total US\$17 billion. Masdar acquires UK battery storage developer Arlington Energy October 26, 2022 Masdar has acquired battery storage developer Arlington Energy in a bid to expand its presence in UK and European renewables markets.

Where is Lyten's next-generation battery energy storage system made?

A robotic arm assembles components of Lyten's next-generation BESS units inside the company's modern, automated manufacturing facility in Gdańsk, Poland. Lyten announces it has completed the acquisition of Northvolt Dwa in Gdańsk, Poland, the largest Battery Energy Storage System (BESS) manufacturing facility in Europe.

Will energy-storage companies win big?

As the market evolves, we expect a relatively small set of energy-storage companies to win big, taking share away from less cost-effective rivals. In this article, we look at how the cost profile of energy-storage systems is changing and what companies in the sector can do to boost their chances of success.

Will East Point Energy buy energy storage projects in the US?

We look forward to a long and successful relationship developing, owning and operating energy storage projects in the US," says Andrew Foukal, CEO of East Point Energy. The transaction agreements were signed on 9 July and the transaction is planned to be completed in Q3 2022.

Can technology improve energy-storage costs?

There is also a plausible best-in-class scenario in which market-leading energy-storage manufacturers and developers deliver a step change in cost improvement: additional process-efficiency gains and hardware innovations

could reduce the cost of an installed system by more than 70 percent (Exhibit 2).

Are energy-storage costs dropping too fast?

The costs of energy-storage systems are dropping too fast for inefficient players to hide. The winners in this market will be those that aggressively pursue and achieve operational improvements. Energy-storage companies, get ready. Even with continued declines in storage-system costs, the decade ahead could be more difficult than you think.
