

Energy storage product launch notification letter

Overview

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

How do I send a product launch email?

1. Pre-launch email template (Send this out around 1-2 weeks before launch day.) 2. Pre-order announcement email (send these 1 – 10 days before the launch date) 3. New product launch day [sent on the day of launch] 4. Beta test launch email (for software and offline products) 5. New Feature announcement (for all products).

Should you write a product launch email?

Yes, writing a product launch email is essential for a successful product release. It helps generate excitement, inform your audience, and drive engagement and sales. With the right structure, your emails can capture attention, highlight key benefits, and motivate recipients to take action.

How do you announce a product launch?

To announce a product launch effectively, you should: Prepare in advance: Write a series of emails leading up to the launch and plan the schedule (start 7-14 days before the launch date). Send pre-launch emails: Build anticipation by teasing the product and offering sneak peeks.

Why is investor participation important in the energy storage industry?

Investor participation is beneficial for the development of the energy storage industry. Facing trends, they should keep a cool head in assessing business models to identify high-quality segments and targets.

Which energy storage projects have a low utilisation co-efficient?

According to a survey by the China Electricity Council, new energy distribution and storage projects have a low equivalent utilisation co-efficient of 6.1%, the lowest among the application scenarios, while the average for electrochemical energy storage projects is 12.2% (Figure 8).

Energy storage product launch notification letter

Elexity and CPS Launch Energy Storage Solution

Elexity integrates EMS with CPS energy storage, offering clients enhanced energy management, cost savings, and ease of participation in grid programs.
