

## Energy storage support policy tax exemption

## Overview

---

The energy storage industry has continued to progress over the course of 2024 and into 2025, buoyed in significant part by the federal income tax benefits in the form of tax credits enacted under the Inflation Reduction Act of 2022 (IRA).

The energy storage industry has continued to progress over the course of 2024 and into 2025, buoyed in significant part by the federal income tax benefits in the form of tax credits enacted under the Inflation Reduction Act of 2022 (IRA).

Not all states classify BESS as a renewable energy facility for purposes of a property tax exemption or exclusion. In those that do, the exemption or exclusion may require the BESS to co-locate next to a renewable energy facility. Typical exemptions or exclusions available for BESS vary by state.

China's playing tax Santa with its "三三三" (three exemptions, three halvings) policy for pumped storage projects [2]. Here's the deal: While your neighbor's rooftop solar gets all the attention, energy storage is sneaking in with better tax breaks. Recent developments include: Uncle Sam's revised.

Tax-exempt and governmental entities, such as state and local governments, Tribes, religious organizations, and non-profits may install energy-generation and storage property to meet energy demands, reach clean energy transition goals, or save money on energy costs. This tax credit can help offset.

This bill allows tax credits for (1) energy storage technologies, and (2) battery storage technology. The bill expands the tax credit for investments in energy property to include equipment that (1) receives, stores, and delivers energy using batteries, compressed air, pumped hydropower, hydrogen.

The bill strikes language that overrides the provision requiring the amount of tax exemption for energy storage systems to be 100 percent if the taxing locality has implemented a revenue share for such systems. February 27, 2024: Passed by indefinitely in Finance and Appropriations (15-Y 0-N).

The IRA in particular enacted or changed 21 energy tax provisions, including tax credits for carbon capture and storage, energy-efficient building modifications, clean electricity generation, and purchases of electric vehicles. 1 The IRA also created direct payments and credit transfers, two new.

## Energy storage support policy tax exemption
