

Enterprise ESS system tender price in China 2025

Overview

How much does a battery energy storage system cost in China?

The procurement exercise has attracted 67 battery energy storage companies but only six have emerged as winners. The average bid stood at CNY 0.473/Wh (\$65/kWh). Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy storage systems (BESS).

Why are EPCs partnering with China's state-owned power companies?

EPCs in China are increasingly procuring and installing BESS for their customers. "As equipment suppliers, collaborating with these state-owned enterprises is important for not only any single tender, but also assessing long-term opportunities from China's power sector," Shi said.
