

Expected ROI of industrial battery cabinet project in South Africa 2025

Overview

Why should we invest in battery energy storage in South Africa?

We applaud the South African government's commitment and dedication to the renewable energy procurement programmes. Battery energy storage will continue to play an important role in the energy transition, and we will continue to be at the forefront across our core markets," says Scatec CEO Terje Pilskog.

Does South Africa have a battery storage tender programme?

South Africa is aiming to procure utility-scale battery storage with two tender programmes: its Battery Storage IPP Procurement Programme as well as hybrid battery storage and variable renewables projects through its Risk Mitigation IPP Procurement Programme.

Why is the South African government using IPP to allocate battery storage?

In 2022, this led to unprecedented load shedding of more than 8 terawatt-hours (TWh), which was a fourfold increase in unmet demand compared with the previous year. As a result, the South African government is using its Independent Power Producer (IPP) Procurement Programmes to allocate firm capacity, including battery storage.

Will solar batteries help South Africa's energy grid?

South Africa's state-owned utility Eskom anticipates that these projects will showcase the effectiveness of batteries in facilitating the integration of renewable energy into the country's energy mix, while simultaneously easing the strain on the national electricity grid.

What is a battery energy storage IPP tender?

In November 2023, South Africa announced preferred bidders for the first Battery Energy Storage IPP Procurement Programme tender, which - if all implemented in full - would add 360 MW of dispatchable battery storage

capacity to the national grid, and are now expected to enter into power purchase agreements (PPAs) negotiations with Eskom.

How much does Scatec's battery energy storage project cost?

The estimated total capex for the battery energy storage project is ZAR 2.2 billion (USD 120 million) of which Scatec's EPC contracts account for approximately 80%. The project will be financed by 90% non-recourse project debt and the remaining by equity from the owners.

Expected ROI of industrial battery cabinet project in South Africa 20

South Africa's 2025 Economic Outlook

Economists are cautiously optimistic about South Africa's economic prospects in 2025. The effects of structural reforms and increased investment in the South African economy have largely contributed to the ...

South Africa's macroeconomic outlook at the start of 2025 is

...

Nqaba Ndiweni, PwC South Africa Consumer and Industrial Products and Service Leaders, says: "The 2025 consumer outlook is notably better compared to the ...

South Africa's inflation forecast for 2025 drops ahead

...

A key survey commissioned by the South Africa Reserve Bank (SARB) to track inflation expectations in the county has revised its 2025 forecast downward, bringing it below the central bank's target level ahead of the ...
