

Expected ROI of microgrid storage project in Finland 2025

Overview

When will the energy grid project start in Finland?

The project proponents have confirmed that the construction works will start in March 2025. The project, which is one of the largest of its kind in Finland, will provide grid services including frequency response and will be able to participate in energy trading on wholesale power markets.

What does Fingrid know about renewable electricity production?

Fingrid sees this first-hand: connection enquiries for renewable electricity production have been growing rapidly for several years, and Fingrid is already aware of approximately 400 gigawatts of wind and solar power production projects.

Will Fingrid increase electricity consumption?

In addition to the scenario used for grid planning, the report outlines an alternative scenario for the increase in electricity consumption. This estimates growth based on investment decisions that Fingrid is aware of and which will raise electricity consumption, as well as connection agreements with customers.

What does Fingrid do?

Fingrid presented forecasts and scenarios for the development of electricity consumption and production in a version of this report published in February 2024 and as part of the Main Grid Development Plan and the Network Vision and Electricity System Vision projects.

How does the Finnish TSO respond to the growing number of renewable installations?

The Finnish TSO, Fingrid, is continuously taking measures to respond to the fast-growing number of renewable installations. The power system is getting more complicated both from a technical and commercial perspective, with

many large changes occurring simultaneously both in electricity production and consumption.

 LFP 12V 200Ah

-  Efficient Higher Revenue
 - Max Efficiency 95.2%
 - Max PV Input Voltage 600V
 - 150% Peak Output Power
 - 2 MPPT Trackers, 150% DC Input Overvoltage
 - Max PV Input Current 10A, Compatible with High Power Modules
-  Intelligent Simple Q&M
 - IP65 Protection Degree, support outdoor installation
 - Smart I-V Curve Diagnostic Function: locate PV string faults accurately and automatically detect faults
 - DC & AC Type II SPD: prevent lightning damage
 - Battery Reverse Connection Protection
-  Flexible Abundant Configuration
 - Plug & Play, EPS Switching Under 10ms
 - Compatible with Lead acid and Lithium Batteries
 - Max. 6 units Inverters Parallel
 - AFI Function (optional): when an arc fault is detected the inverter immediately stops operation
