Overview

What is nickel manganese cobalt battery?

Nickel manganese cobalt batteries are generally used as a rechargeable battery in portable electronic devices and electric vehicles. Increasing transition from conventional to green energy is flourishing the growth of nickel manganese cobalt (NMC) battery market. Global green energy generation contributed 30% of total energy generation in 2023.

What drives the growth of nickel manganese cobalt (NMC) battery market?

This drives the growth of the nickel manganese cobalt (NMC) battery market. As the nickel manganese cobalt (NMC) batteries are widely used various government authorities have established favorable policies to ease the supply and regulate cost of minerals including Nickel and Cobalt.

Who are the key players in the nickel manganese cobalt (NMC) battery market?

Market players including CATL, Clarios, Exide Technologies, Tesla, Saft are the top 5 companies in the nickel manganese cobalt (NMC) battery market. The key 5 players hold nearly 40% of market share. Among these, CATL is one of the major share holding player in the market.

How much is the NMC battery market worth in 2022?

The NMC market reached USD 21.9 billion, USD 25.8 billion, and USD 30.5 billion in 2022, 2023 and 2024 respectively. The nickel manganese cobalt (NMC) battery market has been observing significant growth due to growing demand for efficient batteries from different industrial applications such as EV, ESS and many more.

How big is Norway's battery market?
