

Expected ROI of photovoltaic ESS project in Bulgaria 2025

Overview

How many MW is a new photovoltaic plant in Bulgaria?

The new photovoltaic plant with the capacity of 165MW is added to the 18MW installed capacity of the Garda wind farm, already operated by the PPC Group in Bulgaria. PPC Group, on top of the 208MW of RES in operation or under construction, has an additional 550MW of RES in Bulgaria at various stages of development.

How many photovoltaic plants are being built in Italy?

Today, more than 60% of the RES to be added are already under construction or ready for construction. In Italy, at the end of 2024, PPC Group announced the commencement of operation of two new photovoltaic plants, Carcarello and Luxenia, with a total installed capacity of 32 MW.

Why is PPC group building a new photovoltaic plant in Stara Zagora?

Committed to the vision to further enhance its leading role in the energy transition taking place in Southeast Europe, PPC Group strengthens its green portfolio with the construction of “Colosseum”, a new photovoltaic plant in Stara Zagora in central Bulgaria, with a capacity of 165 MWp.

Will a co-located battery energy storage system support a photovoltaic plant?

At the same time, the co-located battery energy storage system, with 25 MW nominal capacity and 55 MWh installed capacity, which is expected to be completed simultaneously with the photovoltaic plant, will support the operation of the photovoltaic plant and contribute to the stability of the electricity system.
