

Expected ROI of solar plus storage project in France 2026

Overview

Does Ze energy have a solar & battery storage project in Europe?

ZE Energy has secured funding to expand its hybrid solar and battery storage projects across Europe, enhancing stability and sustainability in renewable energy.

What will Ze energy do in 2026?

With its recent funding, ZE Energy is poised to increase its operational footprint across Europe, targeting key markets with a pipeline of hybrid projects. By the end of 2026, ZE Energy aims to reach a capacity of 900 MW in solar PV and 600 MWh in energy storage, a significant leap for sustainable energy in the region.

What is a €1 billion solar project?

The €1 billion project, which will also include a green hydrogen production unit, an agrivoltaic plant, and a data center, will be developed outside the tender scheme for solar managed by the French energy regulator CRE.

Will a solar power plant in France be sold through PPAs?

The electricity generated by the plant will be sold through PPAs to unspecified customers. French energy giant Engie and France-based independent power producer Neoen have announced a plan to build Europe's largest solar-plus-storage plant near Saucats, a municipality in the Gironde department in Nouvelle-Aquitaine in southwestern France.

Why did Ze energy get funding for a hybrid solar and battery storage project?

ZE Energy has secured funding to expand its hybrid solar and battery storage projects across Europe, enhancing stability and sustainability in renewable ZE Energy secures €54M in funding led by Amundi Transition Énergétique, with Demeter and Sorégies, to expand its hybrid solar and battery storage projects.

Can solar energy production & storage help decarbonise the electricity system?

“We are very optimistic about the development of infrastructure solutions combining solar energy production and storage (BESS), which play a key role in decarbonising the electricity system,” explained Matthieu Poisson, CEO of Amundi Transition Énergétique.
