

Export tax rebate for energy storage power supply

Voltage range

636V-876V

Rated voltage

768V

Cell type

Lithium iron phosphate

Overview

The export tax rebate rate for photovoltaic and battery products has been reduced from 13% to 9%. This means that enterprises will receive less tax rebate on exports, which will likely have various impacts both on photovoltaic and energy storage battery exporters and on importers.

The export tax rebate rate for photovoltaic and battery products has been reduced from 13% to 9%. This means that enterprises will receive less tax rebate on exports, which will likely have various impacts both on photovoltaic and energy storage battery exporters and on importers.

Cue the energy storage export tax rebate – your new financial superhero. This article is tailored for: Fun fact: The global energy storage market is predicted to hit \$546 billion by 2035 (BloombergNEF). But here's the kicker – most exporters leave money on the table by missing rebate opportunities.

The export tax rebate rates for a number of products, including refined oil, photovoltaics, batteries, and certain non-metallic mineral products, were slashed from 13% to 9%, with lithium-ion batteries and related items falling under this reduction. Almost immediately, the stocks of energy storage.

On December 1, 2024, a new policy comes into effect in China, reducing the export tax rebate for lithium batteries and photovoltaic products from 13% to 9%. As a professional deeply engaged in tracking global trade and renewable energy trends, this announcement demands closer examination—not just.

BEIJING, Nov. 15 -- China announced on Friday that it will change export tax rebates for a range of products, effective from Dec. 1. The announcement, jointly issued by the Ministry of Finance and the State Taxation Administration, said that export tax rebates for aluminum, copper and chemically.

With the global energy storage market hitting a staggering \$33 billion annually [1], countries are rolling out export tax rebates like hotcakes to boost their foothold in this lucrative sector. Who's Reading This?

(Spoiler: It Might Be You!) This isn't just another boring tax guide. We're

talking.

On November 15, 2024, China's Ministry of Finance announced a policy adjustment, reducing the export tax rebate rate for the photovoltaic and battery industries from 13% to 9%. The photovoltaic and energy storage battery sectors have long been important growth areas for China's manufacturing.
