

Floor standing battery supplier quotation in Switzerland 2030

Overview

Can Switzerland contribute to the development of sustainable batteries?

The battery field is highly dynamic, offering numerous opportunities for Swiss industry to contribute to the development of sustainable batteries along the entire value chain, says Corsin Battaglia, head of Empa's Materials for Energy Conversion laboratory and professor at ETH Zurich, who represents Switzerland in the Battery 2030+ initiative.

What is the market potential for stationary energy storage systems?

The market potential for stationary energy storage systems is enormous: according to current calculations, the demand for buffer storage systems is >100GWh (→ Source Fraunhofer). The battery itself is approx. 130x180x25mm in size and has a modular design. The cell design is prismatic and is surrounded by a stainless steel housing.

Why should you choose Swiss clean battery?

The high standardization of factory construction promotes economies of scale and rapid implementation, so that the total capacity of 7.6 gigawatt hours will be reached in just a few years. When building the factory and equipping it with the necessary production facilities, Swiss Clean Battery draws on established and renowned partners.

Will a large battery storage system help stabilise the power grid?

Frederik Süllwald, our Head of Global Sales & Key Account Management, explains: ' Large battery storage systems will play an increasingly important role in stabilising the power grid in the future. Our stand-alone storage system will help to

Floor standing battery supplier quotation in Switzerland 2030

Top Battery Companies In Switzerland In 2025
