

Government procurement price of MW scale storage system in Argentina

Overview

The government's estimated investment for the projects is around \$500 million USD, with a required completion timeline of 12 to 18 months. The tender will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month.

The government's estimated investment for the projects is around \$500 million USD, with a required completion timeline of 12 to 18 months. The tender will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month.

The government's estimated investment for the projects is around \$500 million USD, with a required completion timeline of 12 to 18 months. The tender will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month. Successful bids will be.

Argentina's AlmaGBA tender for the Buenos Aires metro area will pay a fixed \$10/MW of electricity supplied, with storage capacity bids capped at \$15,000/MW per month. From ESS News Argentina's Wholesale Electricity Market Administration Co. (CAMMESA) has published a contract template to guide.

This week, the Argentinian government opened bids for the AlmaGBA tender, initiated in February 2025 to procure 500 MW of battery energy storage system (BESS) capacity for critical nodes in the Buenos Aires Metropolitan Area (AMBA) grid, enhancing reliability during peak demand. Fifteen companies.

Argentina has awarded 667MW of battery energy storage system (BESS) in its first tender under the AlmaGBA scheme. Nearly half of the volume submitted for the tender (1.3GW) has been awarded by the wholesale market operator CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico Sociedad).

Contract prices settled between \$10,161 and \$12,815 per MW-month,

comfortably below the reference price of \$15,000/MW-month set by CAMMESA, the market's administrator. This pricing dynamic signals both growing competition among developers and the increasing economic viability of battery energy.

Although the Argentinian government has estimated that it will invest half a billion dollars of public funds, the project is being greatly supported by the private funds. The approved bidders will be getting a lesser-paid rate of 10/MW electricity supplied, and the bids in the energy storage.
