

Government procurement price of Solar Panel in Vietnam

Overview

Under the Ministry of Industry and Trade's Decision 21 dated January 7, 2023 that came into force the same day, the maximum purchase price for "transitional" solar power projects is now VND1,185-1,508 (5.0-6.4 U.S. cents) per kWh, depending on the type and excluding VAT.

Under the Ministry of Industry and Trade's Decision 21 dated January 7, 2023 that came into force the same day, the maximum purchase price for "transitional" solar power projects is now VND1,185-1,508 (5.0-6.4 U.S. cents) per kWh, depending on the type and excluding VAT.

- The Electricity of Vietnam (EVN) has just issued a Notice to the Electricity Corporations, Electricity Telecommunications and Information Technology Companies about the purchase price of electricity from rooftop solar power systems in 2024. Based on the central exchange rate of Vietnam Dong to US.

Vietnam's Ministry of Industry and Trade (MIOT) recently introduced new ceiling prices for solar and wind projects that sell electricity to Electricity of Vietnam (EVN). The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability.

Ground-Mounted Solar Power Plants (Without Battery Storage Systems):

- Northern Region: Maximum price of 1,382.7 VND/kWh (excluding VAT).
- Central Region: Maximum price of 1,107.1 VND/kWh (excluding VAT).
- Southern Region: Maximum price of 1,012.0 VND/kWh (excluding VAT).

2. Floating Solar Power.

The purchase price frame for wind and solar power projects in Vietnam that missed deadlines for preferential feed-in-tariffs (FiTs) has been set between VND1,185 and VND1,816 (5.0-7.7 U.S. cents). These projects are often referred to as "transitional renewable energy projects". Under the Ministry.

Vietnamese authorities are looking to retroactively revise purchase prices for 173 solar and wind projects, reducing revenues by 25% to 46%, risking bankruptcies across the renewable energy sector, and jeopardizing investor confidence needed to meet the government's 2030 targets of 73 gigawatts.

The prices of solar panels in Vietnam are subject to fluctuations based on different time periods and government regulations regarding the installation and deployment of solar power systems. At any given time, solar panels may cost anywhere from a few hundred thousand to several million Vietnamese. How much does a solar project cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MIOT) recently introduced new ceiling prices for solar and wind projects that sell electricity to Electricity of Vietnam (EVN). The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects.

How much does a ground-mounted solar project cost in Vietnam?

The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects. Vietnam's Ministry of Industry and Trade (MIOT) has set new price ceilings for the so-called "transitional" wind and solar projects.

Are solar panels regulated in Vietnam?

Vietnam's solar panel trade is regulated under Decree 26/2023/ND-CP, which outlines the Schedule of Export Tariffs and Preferential Import Tariffs. This decree, effective from July 15, 2023, sets specific import duties on goods, including solar panels and related components.

How much does a solar project cost?

The MIOT reduced the ceiling price for ground-mounted solar projects from \$0.0709/kWh to \$0.0502/kWh, a 29% decrease. The ceiling price for onshore wind decreased by 21%, from \$0.085/kWh to \$0.0672/kWh.

How many solar panels will Vietnam have in 2022?

It was officially set to run between 2022 and 2024, with expectations now pointing to the first quarter of this year. There has been no official confirmation from the Vietnamese government thus far. According to Apricum's latest data, the country has installed around 18.47 GW of solar capacity.

Which rooftop solar systems can be developed in Vietnam?

According to the provisions of decision 13, only rooftop solar systems directly

or indirectly connected to the national grid will be developed after registering for connection with the Vietnam Electricity Corporation or units authorised by the Vietnam Electricity Corporation are eligible.
