electricity customers to explore alternative pathways to procure RE. Declining solar photovoltaic (PV) system costs, a national law promoting RE use, good renewable energy resources, and availability of experienced and competitively-priced local developers and service providers have brought the. What is the potential of solar rooftops in the Philippines?

1. The Potential is Massive The Philippines has a solar rooftop potential of over 15–20 GW. That's enough to power millions of homes and businesses sustainably. Metro Manila alone has over 2.5 GW of technical potential just from rooftops (per ADB and IFC reports).

How many commercial and industrial rooftops in Pampanga have solar panels?

Using geospatial analytics, Thinking Machines conducted a study on solar rooftop penetration in Clark, Pampanga, one of the leading special economic zones in the Philippines. The results show that only 1.3% of commercial and industrial (C&I) rooftops in Clark have solar panels.

Is rooftop solar a cheapest source of electricity?

Solar energy is undeniably the cheapest source of electricity today. Rooftop solar empowers homeowners and offers families a choice as well as a way forward to address the rising cost of electricity in a quick and affordable manner.

Should you invest in a rooftop solar PV system?

investing into on-site generation such as rooftop solar PV systems. While the cumulative net savings stand at almost 4 times the initial investment from 14 years of "free" electricity of the system, the initial payback period of 6 years may or may not.

Are solar roofs a good investment?

Homes with solar roofs are also insulated from grid outages brought about by energy supply limitations exacerbated by global warming. At a community level, as more households consider solar energy systems the overall demand for electricity from utilities lowers, reducing strain on the energy grid.

Can a QE finance a solar rooftop project?

Bank Loans QEs can avail of loans from banks to finance their solar rooftop installations. The project cost is generally divided into 70% financing by the bank and 30% equity from the lender. The terms are usually flexible and accommodate the QEs circumstances.
