

## Has ganfeng lithium participated in energy storage projects

## Overview

---

Where is ganfeng lithium based?

In recent years, with the continuous maturity of technology, products, markets, etc., Ganfeng Lithium has deployed a number of lithium battery projects in Xinyu, Huizhou, Chongqing and other places, involving power, energy storage, consumer electronics, solid-state batteries and other fields.

What are the applications of Ganfeng Lithium's products?

Our products have been applied to electric cars, energy storage, 3C products, chemical and pharmaceutical fields, etc. Ganfeng Lithium's business include upstream resource extraction, midstream lithium salt processing and Lithium metal refining, downstream lithium battery production and battery waste management, etc.

What will ganfeng lithium battery do in the future?

In the future, Ganfeng Lithium Battery will continue to deepen cooperation with Dongfeng Motor and other well-known car companies in new solid-state battery technologies and new products, expand application and promotion, provide users with safer and better quality batteries and electric vehicle products, and lead power batteries.

Why did ganfeng invest in lithium salt?

Demand for lithium salt in connection with the rapid growth of the electric vehicle and energy storage industries helped Ganfeng's business, along with a new battery project and gains in the value of financial assets held by Ganfeng, the company said. China has emerged as the world-leading market for EVs.

What is ganfeng lithium's future development strategy?

As an important layout in the upstream and downstream integration strategy of Ganfeng Lithium, the lithium battery segment represented by Ganfeng Lithium is one of the Group's future development focuses.

Can solid-state batteries be used in ganfeng lithium batteries?

In the future, solid-state battery products may be used in Ganfeng Lithium's power batteries, consumer batteries and other products, which can greatly enhance safety, endurance and cycle life, and continue to enhance product competitiveness.
