

Home battery pack project financing options in Saudi Arabia 2030

Overview

Will Saudi Arabia be able to deploy battery energy storage systems by 2030?

According to Saudi Energy Minister Prince Abdulaziz bin Salman, the nation has set a goal of deploying 48GWh of battery energy storage systems by 2030. This ambitious target not only supports Saudi Arabia's energy transition but also injects fresh momentum into the global renewable energy and energy storage markets.

Why is battery storage important in Saudi Arabia?

The 12.5 GWh battery storage project will solve this issue by storing energy and ensuring a steady power supply. This is very important in Saudi Arabia. The nation's energy demand is high because of extreme temperatures and heavy electricity use. BYD's MC Cube-T ESS storage system will be installed at five locations across Saudi Arabia.

Why did BYD invest in Saudi Arabia?

The CTS (Cell-to-System) integration used in the Saudi project allows for better space utilization and higher energy density, ensuring maximum performance. This latest project in Saudi Arabia cements BYD's position as a global leader in energy storage.

Who owns power projects in Saudi Arabia and Abu Dhabi?

Currently, both Saudi Arabia and Abu Dhabi follow a project ownership model where 60% of power projects are controlled by government-related entities such as the Public Investment Fund and Abu Dhabi Developmental Holding Company, while the remaining 40% is owned by international energy and construction firms.

How will Bess projects impact Saudi Arabia?

The successful implementation of BESS projects will significantly contribute to Saudi Arabia's goal of increasing the share of renewable energy in its power

mix, targeting 50% by 2030.
