

Household energy storage power supply car mobile power supply

Overview

Are portable power stations essential lifelines?

For the modern road tripper and car camper—or even homeowner during power outages—portable power stations have emerged as essential lifelines. This isn't just about keeping your smartphone topped up; it's about ensuring your refrigerator, CPAP machine, portable heaters, power tools, and more can run without missing a beat.

Which power station should I buy?

If you're looking to power high-wattage tools or simply pack as much power as possible into a portable unit, you're going to want to look for power stations such as Anker's Solix F200 (formerly called the PowerHouse 767).

How many USB ports does a powerhouse 535 have?

The PowerHouse 535 offers one DC charging port, four AC wall plugs, three USB-A ports, and a USB-C port (60-W max). The 512-Wh capacity (160,000 milliampere-hours) should be enough to charge an iPhone 14 Pro Max up to 30 times or power a standard electric cooler for between 10 and 16 hours, depending on ambient temperatures.

How much power does a powerhouse 535 have?

It can power devices up to 500 watts (750-W surge), uses a lithium-iron-phosphate (LFP) chemistry for a longer lifespan compared to lithium-ion (Li-ion), and it comes with a five-year warranty. The PowerHouse 535 offers one DC charging port, four AC wall plugs, three USB-A ports, and a USB-C port (60-W max).
