

Industrial energy storage project financing options in Romania 2025

Overview

Most of the renewable electricity generation (RES) plants in operation or under development already include battery energy storage (BESS) capacity. 11 contracts have already been signed for funding under the National Recovery and Resilience Plan (NRRP). 15 other projects will.

Most of the renewable electricity generation (RES) plants in operation or under development already include battery energy storage (BESS) capacity. 11 contracts have already been signed for funding under the National Recovery and Resilience Plan (NRRP). 15 other projects will.

Most of the renewable electricity generation (RES) plants in operation or under development already include battery energy storage (BESS) capacity. 11 contracts have already been signed for funding under the National Recovery and Resilience Plan (NRRP). 15 other projects will get financial support.

The Romanian Ministry of Energy has announced a new round of funding from the Modernization Fund dedicated to battery energy storage systems. Romania has launched a new non-refundable funding program for battery energy storage systems to the tune of EUR 150 million (\$158 million), this time.

The call for projects “Supporting investments in the development of electricity storage capacities (batteries) with financing from the Modernization Fund” is extended by one month, namely until February 17, 2025, the Ministry of Energy announced. Initially, the deadline for submitting projects to.

Romania is currently in a critical phase of developing its renewable energy sector (RES), significantly impacting regional energy security and contributing to the global transition toward sustainability. Based on statements from Romanian officials and energy company managers with projects at.

From 2025 to 2030, the country plans to add no less than 4GW (AC) of new energy storage installations, with storage capacity expected to reach more than 480MWh in 2025. This trend reflects Romania’s determination to respond positively to the global wave of energy storage development and to see.

Bucharest, Romania – October 21, 2024 – As Romania pushes towards achieving 5 GW of energy storage by 2026 and 8 GW of renewable energy capacity by 2030, the Solarplaza Summit Romania PV & Storage 2025 will be the essential event to help RE professionals unlock the nation's solar and storage. How much money will be invested in Romania's energy sector?

Today, the Minister of Energy, Sebastian Burduja, announced on Facebook that an additional €150 million will be invested in Romania's energy sector. "I am pleased to announce that the Ministry of Energy is launching a new call for projects financed through the Modernization Fund, aimed at investments in energy storage capacities (batteries).

How much money is needed for energy storage projects in Romania?

The projects must focus on building new energy storage capacities in Romania," the minister stated. According to the minister, as quoted by ZF.ro, the total budget for this state aid scheme is €150 million in non-reimbursable funds sourced from the Modernization Fund.

Which Romanian companies are adding Bess to their renewable assets?

Other Romania-based companies, such as Parapet and Waldevar Energy, have told pv magazine that adding BESS to their renewable assets is a top priority. The May edition of pv magazine features an in-depth look at Romania's solar and energy storage markets.

How much money will Romania Invest in infrastructure in 2022?

More than € 1.5 billion is expected to be invested in new infrastructure projects in the regional cities of Romania in 2022. In Bucharest, construction works for the new bypass will continue as part of a € 1 billion investment.

How much energy does Romania have in 2025?

At the beginning of 2025, Romania boasts approximately 3,000 MW in wind energy and 1,500 MW in solar energy. An additional 2,424 MW in wind and solar projects is expected to be operational in 2025, attracting over €2 billion in investments. Romania's Energy Goals for 2030 Achieve over 32,000 MW in total capacity by 2030.

Is the Bess market heating up in Romania?

The BESS market in Romania is heating up, say local analysts and insiders.

Irene Mihai, policy officer at the Romanian Photovoltaic Industry Association (RPIA) recently told pv magazine that a realistic target for the utility-scale BESS segment in Romania “would be around 2 GWh (around 1 GW of installed capacity)” for 2030.
