

## Industrial park energy storage meng wanzhou

## Overview

---

Meng Wanzhou (: 孟晚舟; born 13 February 1972), also known as Cathy Meng and Sabrina Meng, also informally known in China as the "Princess of Huawei", is a Chinese business executive. She is the deputy chair of the board and (CFO) of Huawei, which was founded by her father .

What is industrial park multi-energy complementary system with hydrogen storage?

Industrial park multi-energy complementary system with hydrogen storage is built. DBSCAN algorithm is introduced to extract typical scenarios based on cluster analysis. Comprehensive benefits are taken into account in configuration optimization. An  $\epsilon$ -constraint is applied to solve the mixed integer fraction optimization problem.

Why do industrial parks need a hydrogen energy storage system?

Excellent performance in energy storage of hydrogen energy can help mitigate the challenges posed by large-scale renewable energy penetration to the power system. With the coordination of electric power and hydrogen networks, industrial parks can make full use of clean energy sources such as wind and solar energy.

What is energy infrastructure in an industrial park?

The energy infrastructure in an industrial park is defined as shareable utilities that are located within the park and provide energy for the park, e.g., heat and electricity <sup>31</sup>. Climate change mitigation requires decoupling energy services and GHG emissions.

Why is shared energy infrastructure important in industrial parks?

Shareable energy infrastructure is universally used in industrial parks and generally has a long service lifetime <sup>27, 28, 29</sup>; thus, the GHG emissions from industrial parks are locked in. Efficient, resilient, and sustainable infrastructure is a crucial pathway to greening industrialization <sup>30</sup>.
