

Interpretation of argentina s power plant energy storage policy

Overview

What is Argentina's energy policy?

1. Policy Argentina has a target to reach 8% of renewable electricity generation by 2016, established in 2006 by Law 26190. In order to reach its target, in 2009 Argentina launched an auction through its national energy company (ENARSA).

What is the energy transition plan in Argentina?

On July 7, by Resolution 517/2023 of the Secretariat of Energy (of the Ministry of Economy), Argentina approved the National Energy Transition Plan to 2030 and the Guidelines and Scenarios for the Energy Transition to 2050 .

What is Argentina's energy sector regulatory framework?

Argentina's energy sector regulatory framework aims to provide more market certainty and attract foreign investment to enhance oil and natural gas production for exports. Given the current economic challenges, Argentina's federal and provincial governments continue to have a significant role in the energy sector.

Is the Argentine renewable PPA market a corporate market?

This initial trend started to shift towards a corporate market through Resolution No. 281/2017 of the Argentine Ministry of Energy and Mining (currently, Secretary of Energy), which established a set of rules for the corporate renewable PPA market (MATER).

What role does Argentina play in the energy sector?

Given the current economic challenges, Argentina's federal and provincial governments continue to have a significant role in the energy sector. The Argentine government views the oil and natural gas sector as a major driver of exports and a way to generate revenue.

How is the Argentine power sector governed?

The Argentine power sector is governed by Law No. 4,065 and its regulations, Decree Nos. 1398/1992 and 18619/95, and Resolution No. 61/1992, among others (the Regulatory Framework). The Regulatory Framework is characterised by the following main features:

Interpretation of argentina s power plant energy storage policy

Mexico Enacts New Laws for the Power Sector

Now, any existing power plant using clean energy technology will receive CELs, regardless of its age or whether it contributes additional renewable capacity. In practice, this ...

Argentina energy profile

The IEA examines the full spectrum of energy issues including oil, gas and coal supply and demand, renewable energy technologies, electricity markets, energy efficiency, access to ...
