

Italian energy storage lithium battery factory is in operation

Overview

The Teverola gigafactory represents a landmark achievement in European manufacturing as Italy's inaugural lithium-ion battery production site. Located in Caserta province, the facility spans 265,000 square meters and began operations with an initial capacity of 300 MWh/year.

The Teverola gigafactory represents a landmark achievement in European manufacturing as Italy's inaugural lithium-ion battery production site. Located in Caserta province, the facility spans 265,000 square meters and began operations with an initial capacity of 300 MWh/year.

We are building Italy's first "Gigafactory", a state-of-the-art facility to satisfy rapidly growing demand for lithium-ion cells for electric vehicles, industrial equipment, grid battery storage and other applications. Scheduled to open in 2025, the Italtel site will cover more than 300,000 m².

Italian multinational energy company Eni intends to become a player in battery cell manufacturing for stationary energy storage systems. Yesterday (24 September), the oil major announced that development activities have begun for a new lithium iron phosphate (LFP) battery cell factory through a.

In April 2025, Gruppo Seri secured €150 million in syndicated financing to expand Italy's first lithium battery gigafactory in Teverola, Caserta. This project, part of the European IPCEI Batteries 1 initiative, aims to bolster the EU's energy independence and advance its green transition. The.

System integrator Energy SpA and its vertically integrated peer Pylon Technologies (Pylontech) have formed a joint venture (JV) to set up a gigafactory in Italy producing batteries for energy storage. The Italy and China-based companies (respectively) have set up the JV entity Pylon LiFeEU S.r.l.

È stata avviata la fase di testing della prima linea di produzione made in Italy di batterie al litio. La gigafactory di Energy Spa, finanziata con contributi a fondo perduto del PNRR per 7,15 milioni di euro, ha attualmente una capacità produttiva di 0,8 GWh, ma è previsto che diventi 10 volte.

This article provides a comprehensive insight into the best top 10 battery manufacturers in Italy, presenting details such as their establishment dates, locations, corporate backgrounds, and main product offerings. The research predicts that Italy's grid-scale energy storage market will become one.
