

## Italian lithium energy storage power supply procurement bidding

### DETAILS AND PACKAGING

- 1 USER MANUAL PDF
- 2 RJ45 Cable For RS485/CAN
- 3 Battery in Parallel Cables
- 4 RJ45 TO USB Monitor Cable
- 5 M8 Terminal\*4

## Overview

---

When will Italy's new energy storage capacity procurement auctions take place?

Terna's thinking. The date is set. The first of Italy's new energy storage capacity procurement auctions (MACSE) will take place on September 30, 2025, Terna's president for grid development strategies, Francesco Del Pizzo, has confirmed.

Is Italy a good market for large-scale energy storage?

Alongside the MACSE auction, they touched on grid, project development and opportunities for software and optimisation providers. Mahael Fedele, Partner, CEO of Sphera Energy, said that Italy has several unique characteristics that make it an exciting market for large-scale storage. "The country obviously needs energy storage.

How much does a battery storage system cost in Italy?

EUR 2 million per MW (21) for the battery storage system reference project and EUR 1.7 million per MW for hy ro-pumped storage (22).(44) As for the battery storage system, Italy assumed annual horities used the results of the 2030 Italian scenario in line with the 'Fit for 55' package, developed by RSE, where.

Can the Italian electricity system be financed by General transmission or distribution tariffs?

transmission or distribution system operators. As such, it cannot be financed by general transmission or distribution tariffs.(165)The Commission notes that the measure will offer short-term flexibility to the Italian electricity system, by providing storage capacity in the form of standardised time-shifting products trad.

Is Italy a good place to invest in energy storage?

Italy represents unique energy storage opportunities, but many challenges and uncertainties around the different revenue streams remain.

Is the electricity storage capacity procurement mechanism compatible with EU plans?

"MASE has approved the proposal for the regulation of the Electricity Storage Capacity Procurement Mechanism." In December 2023, the European Commission confirmed the framework was compatible with EU plans for the development of new electricity storage capacity within its internal market.
