Overview

The Ile de Romainville Solar Park – Battery Energy Storage System is a 5,000kW energy storage project located in English River, Seychelles. The rated storage capacity of the project is 3,300kWh.

The Ile de Romainville Solar Park – Battery Energy Storage System is a 5,000kW energy storage project located in English River, Seychelles. The rated storage capacity of the project is 3,300kWh.

The battery energy storage system (BESS) to be installed accounts for a large portion (over 60%) of the cost and by itself does not produce any energy, but rather enables renewable energy to be utilized.

Average battery energy storage capital costs in 2019 were \$589 per kilowatthour (kWh), and battery storage costs fell by 72% between 2015 and 2019, a 27% per year rate of decline.

In the cost table, we have estimated battery costs based on typical battery output as follows: battery power 7kW peak / 5kW continuous for each battery. Let's take a look at the average solar panel battery storage cost, covering different system types and installation prices.
