

## Lexus energy storage pump relay does not work

## Overview

---

Can a car start with a bad fuel pump relay?

No, a car won't start with a bad fuel pump relay because no power will go to the fuel pump, meaning no fuel is coming into the engine. Will a Fuel Pump Relay Throw a Code?

Yes, a fuel pump relay will throw a P0230 fault code but only on some cars. Depending on what's wrong with the fuel pump relay, you could also get a P0087, P0251, or P0148.

How does a fuel pump relay work?

The fuel pump relay is a little more complicated than the average one. In this case, for the fuel pump relay to work, it needs to get power from the ECM and a signal from the ignition switch. Without both, the electrical circuit isn't closed, and the relay isn't letting current through.

Why is my fuel pump relay not working?

The ground could also be the cause because, with no ground, there is no power either. Testing ground connections are a little different from testing power wires, and you have to know which pin on the fuel pump relay is the ground. If you don't know, check some forums for your specific car and see if you can find the answer.

Why is my fuel pump not working?

If you are not getting any power to the fuel pump, it could mean that your fuel pump relay is bad, you have some wiring or ground issues, a blown fuse, ECU, or the ignition switch. Can You Bypass a Fuel Pump Relay?

Yes, you can bypass a fuel pump relay by hard wiring the 12V power supply pin on the relay connector and the 12V exit to the fuel pump.

Can you bypass a fuel pump relay?

Yes, you can bypass a fuel pump relay by hard wiring the 12V power supply pin on the relay connector and the 12V exit to the fuel pump. However, to do that, you need a wiring diagram for your vehicle to know which pins are the 12V. Will a Car Start With a Bad Fuel Pump Relay?

.

How many volts should a fuel pump relay have?

When the car and fuel pump are running, the fuel pump relay should have between 12 and 13 volts. Anything more or less than that means an issue exists in the electrical system. Why Am I Not Getting Any Power to My Fuel Pump?
